

Our customers told us what they needed...

"I want an interface that is easy and intuitive to use and that **works!**" Done ✓

"I want to use a review tool that's **easier** and **faster** than the litigation support software I'm using now." Done ✓

"Our attorneys can't spend all day in training sessions. We need a system that is **intuitive** and easy to learn." Done ✓

"I want a **secure** system and I want to be able to review from my couch!" Done ✓

"We need a **cost-effective** solution that provides good project management." Done ✓

"We really need a **reliable** system that will export data seamlessly for production once we've completed our review." Done ✓

"We really need the ability to **manage** our case requirements and still address cost concerns." Done ✓

"Thorough error and productivity **reporting** is a must." Done ✓

...and we took it from there...Wrivet

In response to our customers' growing concerns over the exorbitant costs of electronic discovery, Midnight Run® developed a system that allows review of electronic files and email in a secure online review system.

Success with Wrivet™

Wrivet is scalable as your case grows.

Wrivet has unprecedented processing throughput.

Teams work more efficiently and have better success when information is within reach at all times from any location.

Wrivet project management and customer support make online review easier.

Wrivet support is provided by experienced staff who understand the software, the litigation support process and your urgency.

Wrivet Features

Seamless native review of over 350 file types, including Microsoft Outlook with calendar, journal, contact and post it items

Privilege word highlighting

Date and search term culling

Full audit and reporting capability

Batch printing with control numbers and slip sheets

Comprehensive file inventory

De-duplication by custodian or entire population

Full searching capabilities utilizing Boolean operators

Ability to redact documents

Flexible document workflow

Ability to tag documents

Production in TIFF, PDF, PST, and native file format

The avalanche of electronically stored information has added a new dimension to the discovery process for law firms and corporations. In many corporations, more than 90% of data is never actually printed. Nearly all data is created and managed electronically. **Law firms are increasingly using hosted e-discovery tools to secure and manage significant litigation matters.**

Advantages of Wrivet E-Discovery Review

Wrivet provides legal teams with the tools they need to address this explosion of information through an organized, simplified, efficient, and cost-effective means of managing information for large-scale electronic file reviews.

Wrivet is an online data management and data mining tool used by large law firms and legal departments to analyze and review electronically stored information in the context of electronic discovery (e-discovery).

Data Management

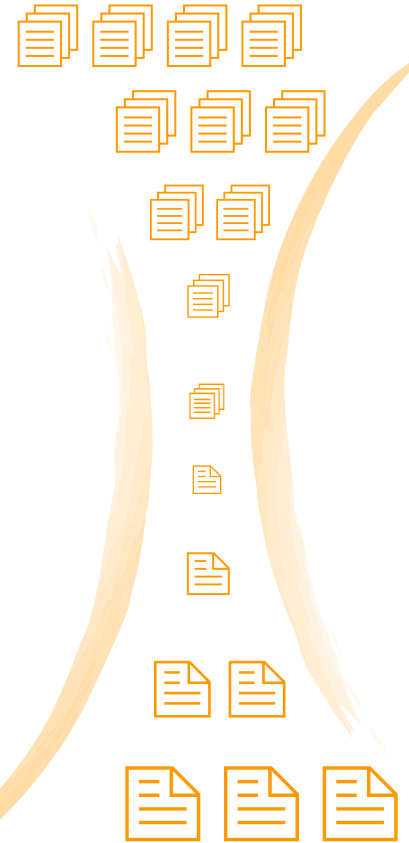

Wrivet gives users secure access to review e-mail and over 350 other file types natively; and to search, review, tag and redact documents for subsequent production in TIFF, PDF, PST or native file format.

Quality Control & Consistency

Wrivet offers legal teams a means to identify duplicative, privileged, or trade secret information and treat that information consistently throughout the review process. Wrivet provides full audit trail capabilities to verify who reviewed and tagged documents and when.

FRCR Rules Support

In December 2006, The Federal Rules of Civil Procedure were amended. These rules now specifically direct law firms in handling e-discovery. Firms are responsible for adhering to these procedures, and face sanctions if the FRCR rules and guidelines are not followed. Lawyers must employ defensible practices when handling e-discovery requests and Wrivet provides a forensically sound approach to handling and reviewing electronic files while reducing the cost of this expensive process. Wrivet tracks every file throughout its processing, filtering and review. Furthermore, Wrivet reduces costs by culling 'system' and duplicate files. Wrivet can filter millions of files by date and/or search criteria in minutes.

Digital Document Management Services

Electronic Discovery Services

- ▶ Metadata and text extraction of over 350 native file types, including Microsoft Outlook and many other e-mail formats
- ▶ Date and Search Term culling
- ▶ De-duplication by custodian or by entire population
- ▶ Data conversion of native files to TIFF and PDF formats
- ▶ Native file linking
- ▶ Document productions in TIFF image, PDF and native file formats
- ▶ Client specified deliverables
- ▶ Project and database design
- ▶ Project management
- ▶ Complex file analysis
- ▶ Collections

Data Conversion Services

- ▶ Conversion between Concordance and Summation
- ▶ Conversion of flat-file databases to relational databases
- ▶ Conversion between transcript formats
- ▶ Conversion between image formats
- ▶ Conversion of Microsoft Excel spreadsheets and Microsoft Word tables to database formats
- ▶ Conversion of selected Concordance or Summation data and images to CaseMap, Trial Director or Sanction
- ▶ Conversion of various video formats to MPEG for synchronization with common transcript formats
- ▶ E-mail formats, including:
 - Microsoft Outlook
 - Microsoft Outlook Express
 - Lotus Notes
 - Novell GroupWise
 - Google Gmail
 - Yahoo! Mail
 - AOL
 - Eudora
 - Netscape
 - Thunderbird/Mozilla
 - Many more

Macintosh Conversion Services

- ▶ Conversion of common e-mail formats (e.g., MBOX, EMLX, Entourage) from Mac to Windows format
- ▶ Conversion of most electronic file types from Mac to Windows format
- ▶ Extraction of full text, metadata elements and links to original files for inclusion in common database formats
- ▶ Parsing and conversion of compressed files in common formats (e.g., SIT, SEA, HQX, BINHEX)
- ▶ Identification and conversion of files without file extensions
- ▶ Identification and conversion of files containing illegal Windows characters
- ▶ Data de-duplication and search term culling

Imaging and Related Services

- ▶ Document preparation, high-speed imaging and reassembly
- ▶ TIFF, JPEG and PDF formats available
- ▶ High volume capacity
- ▶ Preparation of load files for all litigation case management systems
- ▶ Control numbering, Bates® number branding and endorsement of custom legends
- ▶ Quality control
- ▶ Color imaging
- ▶ On-site imaging services
- ▶ OCR
- ▶ Logical document and attachment unitization
- ▶ Redaction services
- ▶ Coding services
- ▶ Capture of existing Bates® numbers
- ▶ CD, DVD duplication

With the explosion of electronic information the costs of responding to and conducting discovery have been spiraling out of control and have become a major concern for corporations and their law firms who face demands for write-offs and discounts. **Sophisticated legal consumers, including most large corporations, demand that their outside counsel use e-discovery tools to reduce legal expense.**

The Wrivet System: State-of-the-Art Technology Built to Work

Hosted: Midnight Run securely hosts your data and the Wrivet application so there are no IT issues to manage.

- ▶ Full Support and Training
- ▶ Secure

Accessible: Wrivet data is accessible anytime, anywhere.

- ▶ Wrivet is accessed through secure remote login.
- ▶ Wrivet can be remotely administered by authorized users.
- ▶ Legal teams access the data on Midnight Run's servers without actually transferring any files.
- ▶ Legal teams can review anywhere, anytime.

Cost Effective: The Wrivet system allows you to leverage your firm's review process and manage your case requirements while addressing cost concerns.

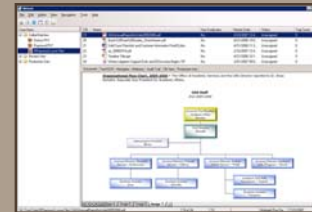

- ▶ Wrivet filters data that is relevant to the matter at hand, saving both time and money by reducing unnecessary review of non-responsive and irrelevant documents.
- ▶ Wrivet's training and project management services ensure an efficient and successful document review process.
- ▶ The Wrivet user interface increases the document review speed.

Organized: In e-discovery a single gigabyte of data can easily generate as much as 100,000 pages of information and the average person has anywhere from 5 to 10 GB of data on their computer. This means the average person has anywhere from 500,000 to 1,000,000 pages worth of system files, email, and soft documents that are discoverable. Wrivet processes and filters over 350 file types and email programs and renders the information in a consistent and useful way for attorneys to organize and review.

Volume: The Wrivet hosted environment and scalable administration handle the volume that corporations and law firms are faced with today. For example: Exxon generates 5.2 million emails daily. Its employees have 95,000 desktops and laptop computers. A discovery request often requires the collection of individuals' hard drives and there may be five to fifty individuals whose information may be relevant to a discovery request. The amount of data collected can become equivalent to tens of millions of pages.

Review Speed: Lawyers can review documents online in a variety of ways, such as using search terms and dates to establish relevancy. Wrivet makes review faster than using traditional litigation support software.

Wrivet Grid View

The preview screen allows users to:

- View file details
- Sort by date
- View assignment details

Wrivet Full Screen View

The full screen mode allows users to:

- Tag
- Redact
- View metadata information
- Review documents easily

Litigation Support and Print Document Handling

Coding Services

Midnight Run provides document coding services from our San Francisco production facility. Our experienced staff have coded and delivered millions of pages to satisfied customers all over the United States.

Midnight Run is committed to design meetings with our clients for the development of a comprehensive coding manual with database fields that better support your case requirements. During the life of each project, we provide up-to-date timelines and status information. If pricing is an issue, Midnight Run has offshore affiliates with appropriate security requirements. Wherever the coding is performed, however, your data will be quality controlled in our San Francisco facility.

Domestic Coding Services:

- ▶ Full or economy bibliographic coding options
- ▶ Expert quality control of all coded information
- ▶ Full quality analysis to ensure consistency of coded data and adherence to coding guidelines and client requirements
- ▶ Midnight Run ensures timelines and deliverables meet client protocol and project requirements

Imaging and Coding

Our facility is designed to handle large scale scanning projects. We utilize high-volume, high-quality color and black & white scanning machines and industry leading software tools that capture images complete with Bates numbering, annotation capabilities, OCR (optical character recognition) and seamless output to Ringtail, Concordance, Introspect, Summation, Trial Director, IPRO, DocuLex and many other case management systems. We also offer complete unitization and indexing of documents for better searching.

Blowbacks

Midnight Run offers high-volume blowback services. Our capacity is limitless when it comes to printing to color or black and white. We utilize state of the art printing equipment combined with industry leading software tools that allow for seamless printing of TIFF, PDF and native files.

Capacity

Midnight Run's production facility is equipped and staffed to manage any type of project. 24/7 production and pick-up/delivery by staff trained in workflow strategy means your project is delivered on time and error-free, and the integrity of original documents is maintained.

Quality Control

Knowing your job is being handled by someone experienced in legal document management gives you confidence. Midnight Run offers security and expert handling of your documents.

Local & Worldwide

Midnight Run's qualified customer service representatives pick up and deliver your documents free of charge anywhere in the San Francisco Financial District, and we handle secure pick-up and delivery of your data and documents from anywhere in the world.

Printing and Copying

Midnight Run offers all of the traditional copy and print-based services: High Speed Black & White and Color Copying, Oversize Copies, Document Numbering and Bates Labeling, Binding and Finishing, On-site Copying, and more.

We're 10 years old, and so are many of our customer relationships.

Unsurpassed QA

Clients stay with Midnight Run because they can count on our meticulous attention to detail and adherence to deadlines. We work around the clock to handle your projects the way you would – if you had the time and equipment to do it yourself.

We inspect each job thoroughly to ensure exacting adherence to instructions and quality control of the final product. Our employees understand you can not afford mistakes.

Customer Service

We are a leader in electronic litigation support services because of our experience and commitment to quality. We believe our loyal customer base deserves our best when it comes to customer care and product excellence.

We specialize in handling information for legal clients. Our employees strive not only to meet, but to exceed your expectations on a job-by-job basis. Every member of our team knows how critical the discovery, production and trial preparation phases are to your success. Whether you send us a single file, a thousand boxes, or 500 GB you still get our commitment to 100% accuracy.

High Level Service with High Level Security

At Midnight Run, we understand your security concerns and take them seriously. We require signed confidentiality agreements from all our employees and have systems and procedures in place to ensure the confidentiality and security of your data. Midnight Run has a strict policy regarding document destruction and IT infrastructure techniques. Our fully secured facility is located in the heart of the San Francisco Financial District.

Consulting Services

The ability to find trained technology experts in the niche industry of litigation support is challenging and time consuming. Midnight Run has assembled a team of experts who are available to consult you and your team on complex technical issues you may face as you prepare for discovery, production, motion practice or trial. To mitigate what can seem like an overwhelming task, our approach is to begin by consulting with our customers on efficient and cost effective solutions that meet the case and situational requirements. Our experience with the following applications informs our consulting practice:

Adobe Acrobat	Introspect	Microsoft Excel
CaseMap	IPro	Opticon
Concordance	LAW	Ringtail
Doculex	LiveNote	Sanction
Summation	Microsoft Access	Trial Director
	SQL	

"...thanks so much for the personal touch today on training. That was way above the call of duty. You have really helped us on this project both from a support and a pricing standpoint. This has allowed us to better transition this data to you and maintain a good position with our case team. For all of that... THANKS! THANKS! THANKS!"

– Litigation Support Specialist, National Law Firm

Midnight Run, Inc. is a leading provider of litigation support services to clients who need reliable, stable and scalable solutions. Incorporated in 1997 in San Francisco, Midnight Run was formed to provide assistance to law firms and legal departments with document handling needs. In 2002, under the leadership of founder Ronda Raymond, Midnight Run expanded its electronic and technology services due to client demand. Today Midnight Run provides services to clients all over the United States and has responded to customer demand for online services with Wrivet, a scalable online e-discovery tool developed with the same dedication to error-free results as the company's digital and traditional services. Midnight Run is a women-owned business.

Midnight Run's management and staff have many years of experience in litigation support. With backgrounds as paralegals and litigation support professionals at leading law firms they understand their clients' most critical issues and how to solve them, providing seamless integration across all electronic litigation support offerings while caringly serving its customers with the highest of standards.
